The emergency toilet when the sewer is down

1. **Stop flushing.** If officials say sewer lines are damaged, or drains back up, don't flush.
2. **Line it.** Line the toilet bowl or a 5-gallon bucket with two heavy-duty trash bags.
3. **Absorbent.** After each use add kitty litter, sawdust, dirt or shredded paper to absorb liquid and cut odor.
4. **Seal and store.** Tie bags shut and store in a lidded can outside, away from water sources, until pickup.
5. **Hand hygiene.** Hand sanitizer or soap and water right next to the toilet. Every time.
6. **Kit list.** 5-gallon bucket with lid, heavy-duty bags, absorbent, toilet paper, sanitizer, gloves.
