READY WITH RAY / FREE FIELD GUIDE

Stay warm without power, without poisoning your family

1. **Never indoors.** No grills, camp stoves, generators or gas ovens to heat the home. Not in the garage either.
2. **Heat less space.** One small interior room. Close doors, cover windows with blankets, block drafts.
3. **Layer up.** Hats, dry socks, layers, sleeping bags. Change out of damp clothes.
4. **Body heat.** Group together in one room. Check on older neighbors.
5. **CO alarms.** Battery or battery-backup alarms on every level and outside sleeping areas.
6. **Warning signs.** Headache, dizziness, nausea, confusion. Get to fresh air and call 911. Shivering that stops is an emergency.
